Optima Engineering Announces New Office in Greenville, SC to Expand South Carolina Presence

Charlotte, NC – October 10, 2024 – Optima Engineering, a leading employee-owned MEP (Mechanical, Electrical, and Plumbing) engineering firm with over 30 years of experience, is pleased to announce the opening of a new office in Greenville, SC. This expansion is part of Optima's strategic plan to broaden its geographic reach and strengthen its presence across South Carolina and future markets.

"We are excited to bring Optima Engineering's expertise and commitment to excellence to the Greenville community," said Steve Daley, President of Optima Engineering. "Opening a new office in Greenville not only enhances our ability to serve clients throughout the state but also reflects our confidence in the continued growth in the region."

The Greenville office will be led by Ben Barrier, a principal and Mechanical Engineer at Optima Engineering. Ben's extensive experience in MEP design and project management, along with his passion for community enhancements, provides a strong foundation for our new office. Ben has been a key contributor to the firm's success and will continue to uphold the firm's values of quality, collaboration, and innovation in the new market.

"Greenville represents an exciting opportunity for us," stated Ben Barrier. "We look forward to building strong relationships with local clients, providing innovative and tailored solutions, and contributing to the development of sustainable, high-performing buildings in the region."

The new Greenville office officially opened October 1st and will offer the full range of Optima Engineering's services, including mechanical, electrical, plumbing and technology engineering, as well as sustainable design and energy modeling.

About Optima Engineering

Optima Engineering, established in 1992, is a leading regional firm specializing in sustainable and innovative engineering solutions. With offices in Charlotte, Raleigh, Asheville, and Greenville, SC, our expert team delivers high-performance, efficient MEP+T design services for a diverse range of building types across the Mid-Atlantic. At Optima Engineering, we have championed the concept of Net Zero since 2006, focusing on reducing environmental impact, cutting operational costs, and enhancing building resilience. Our growing team of nearly 100 professionals includes 26 Professional Engineers, 19 LEED Accredited Professionals, a Certified Energy Manager, a Certified Technology Specialist Designer, and Registered Communications Distribution Designers. Our comprehensive services span Mechanical, Electrical, Plumbing, and Technology systems, as well as Fire Protection, Solar PV, Energy, and Commissioning.
